BRAINSTORM & IDEA PRIORITIZATION

Tangella lakshmi devi Yamuna devi. J Asiyama. T

B CONTROL CO2 EMISSION:

Co2 emission can be reduced by making power on site with renewables and other climate friendly energy resources.

Co2 emissions contribute to global warming and climate change, which can significantly cause severe impacts and consequence for humans and the environment. co2 emissions act like a blanket in the air, trapping heat in the atmosphere, and warming up the earth.

IDEAS THAT ADDRESSES THE PROBLEM STATEMENT

PRIYANKA.R

Burning of fossil fuel

Greenhouse gases

Co2 absorbs radiation

Combustion of fuel engines

TANGELLA LAKSHMI DEVI

Methane from landfills

Natural gas processing

Nitrous oxide from agricluture Industrial gases

Chemical

production

YAMUNA DEVI. J

Cutting down trees

Petroleum produc tion

Fossil fuel consumption

ASIYAMA. T

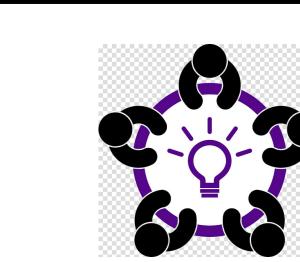

Transportation

Power generation

Deforestation

cement manufacturing

Burning of fossil fuel

Co2 absorbs radiation

Natural gas processing

Transportation

Deforestation

Petroleum production

Combustion of fuel engine

Cement manufacturing

Greenhouse gas

Industrial gas
